

- About me

- Completed an undergraduate degree in Computer Science in 2020
- Always been very interested in applied computer ethics

- My PhD

- Trans people are a very marginalised group
- Does social media give them relief or marginalise them further
 - How does this change at different stages of social and medical transition?

- My PhD will help the trans community
 - Looking into the good and bad points of their social media experience
 - Figuring out how to minimise the bad and maximise the good
- My PhD will likely help other vulnerable groups
 - Other groups are harmed by social media policies that hurt trans people
 - Contributing to a wider conversation about who social media benefits
